We are proud to bring to the UK market the range of **M3 Mixer Buckets**. Produced in 7 models, the M3 Mixer Bucket is made exclusively from **Hardox 400** wear-resistant steel and components of the highest quality to ensure maximum efficiency and durability.

Suitable for all types of loader (can be used with machines ranging from 20 to 170 HP), the M3 range of bucket mixers are ideal for quick and cost-effective mixing of high quality concrete.

Batches of concrete can be mixed under any conditions in extra-quick time, with significantly reduced operating costs. With the application of the M3 quick-hitches, in both mechanical and hydraulic versions, attachment changeover times are reduced to an absolute minimum. The M3 Mixer Buckets can be used on skid steers, telehandlers, loading shovels, back-hoe loaders and excavators from 2.5 ton to 30 ton.

MODEL	BM 200	BM 250	BM 350	BM 450	BM 600	BM 700	BM 1100

The German designed and manufactured **DBM 750 Pan** concrete mixer allows for large quantities of concrete and mortar to be made conveniently, economically and of high quality.

The DBM 750 is made from wear-resistant steel and components of the highest quality to ensure maximum efficiency and durability.

Equipped with a sturdy oil bath gear unit with thousand-fold tested reliability, the DBM 750 gear unit transfers the force onto the four suspended arms of the stirring mechanism.

The adjustable stirring blades guarantee excellent mixing action for all types of concrete and mortar.

The mixer comes standard with a power take off shaft, shear bolt protected or as an extra, a hydraulic motor drive.

The DBM 750 has a plate thickness of 5/6mm and can be fitted to the tractor 3 point linkage or picked up with pallet forks using the mixers integral pallet fork slots.

Mixing volume: 800 Litres

Bucket height: 70cm

Bucket weight: 635kg

Drive unit: Oil bath gear unit with normal profile
